1 . Indiagnal Valla (herry	7.00
subhirtella. Higan Cherry	3.50

PRUNUS—Continued subhirtella pendula, Shidare-Higan Weeping Cherry.. 3.75 tomentosa, Nanking Cherry 4.15 tribola, Flowering Cherry 4.90 yedoensis, Yeddo Cherry 4.50

NOTE:—Successful propagators have found that they must use Oriental understock for Japanese Flowering Cherries, The closer the relationship between understock and graft the better the results.

STRATIFICATION Cherry Seed requires about four months to afterripen. Outdoor stratification is not always satisfactory. The best known method is to stratify in moist sand in an ice house, maintaining 38 deg. to 41 deg. F. Care should be taken to keep the box moist at all times. Place in stratification sufficiently early so that the seed is fully afterripened as soon as Spring permits sowing outdoors.

NEW CROP Buxus Koraiensis

per lb. \$4.50

ENKIANTHUS CERNUUS RUBENS

An English Horticultural Journal writes: ENKIANTHUS CERNUUS VAR. RUBENS.

"The leaves are laceolate-elliptic and rather under an inch in length while the bush is in flower. The pendant flowers are moderate in size, deep red and produced from the apex of very short growths. A native of Japan."

> Messrs. T. Sakata & Co. Offer Clean Seed at \$13.50 per lb. f.o.b. Seattle, Wash.
